

Hello from Dr. Jeff and Lino!

We've got a few things for you in this newsletter. One is an event next week where Dr. Jeff interviews Gil Alan and his ability to communicate with animals after they have passed. If you are intrigued by this, sign up below.

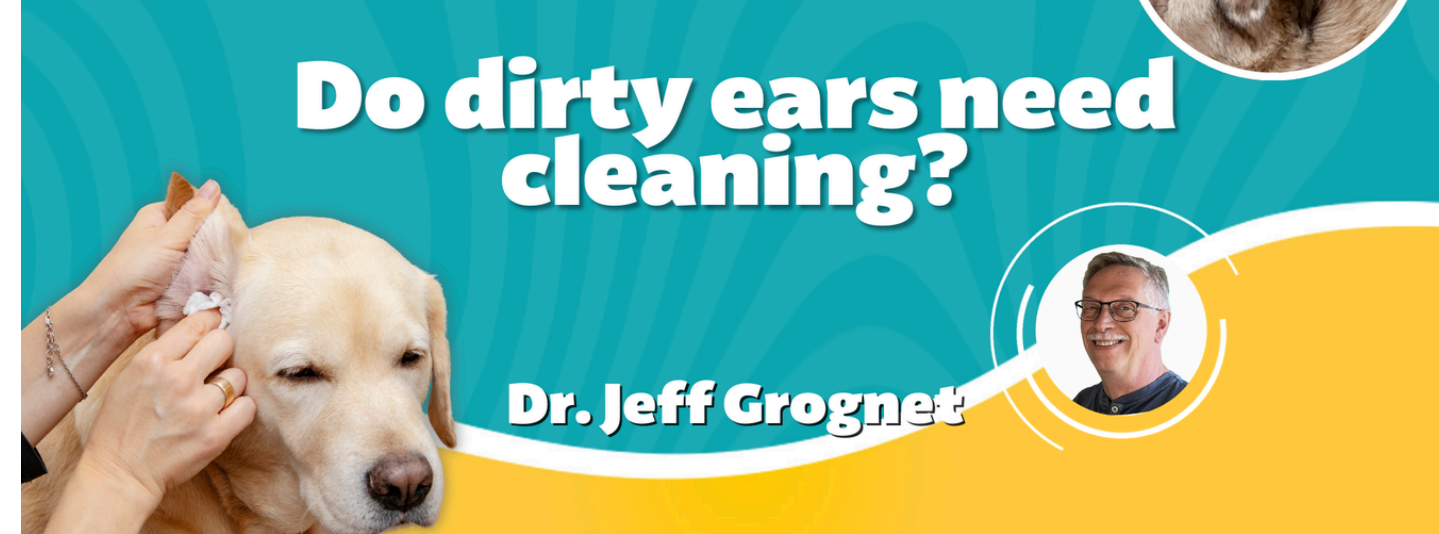

There is a new medication available for itchy dogs. Take a look below so that you understand the concerns with this one.

We want the best for your pet. Follow New Earth Vet and you will be on your way.

All the best,

Dr. Jeff and his assistant Lino

Quote of the week

If animals could speak, the dog would be a blundering outspoken fellow. But the cat would have the rare grace of never saying a word too much. - Mark Twain

New Drug for Dog Allergies?

New Drug on the market for allergies in dogs - READ THIS FIRST

The Zenrelia label contains a boxed safety warning regarding the risk of fatal vaccine-induced disease from modified live virus vaccines and inadequate immune response to vaccines, with instructions to discontinue Zenrelia for at least 28 days to 3 months prior to vaccination and at least 28 days after vaccination.

This boxed safety warning is specifically due to the results of a vaccine response study in which 8 young, unvaccinated dogs were treated with 3 times the label dose and were sick at the time of vaccination.¹¹ Future studies should evaluate the response to vaccination in healthy dogs.
